(TS//SI//REL) New 'R Spotlight' Video: GHOSTHUNTER and the Geolocating of Internet Cafes

FROM: Research Directorate

Run Date: 07/30/2009

(TS//SI//REL) Announcing a new R Spotlight webcast! GHOSTHUNTER is a multi-agency effort focused on geolocating Time Division Multiple Access (TDMA) Very Small Aperture Terminal (VSAT) Internet access points. In particular, the focus is on geolocation of Internet cafés in the Middle East/North Africa region in support of US military operations. To date, it has successfully geolocated over 5,000 VSAT terminals in Iraq, Afghanistan, Syria, Lebanon, and Iran.
